EDUCATION

NZQA Level 6 Certificate in Applied Software Development
Dev Academy Aotearoa, 2024

Bachelor's Degree in Information & Logistics
Technical University of Liberec, Czech Republic, 2008

CERTIFICATIONS

Team Accelerator Workshop (BELBIN)
Trimble 2020

REST with Spring
Baeldung 2019

Lean Testing, Intro to DevOps, Mentoring Testers
Assurity 2016

Fundamental Training in Security Testing
Kiwicon 2014

Java & Cucumber Fundamentals for Testers
Orion Health 2013

ISTQB Foundation Certificate in Software Testing
ANZTB 2013

ADDITIONAL

BEA WLI
Cleverlance, 2007

XML Schemas, Web Services in J2EE, Java & Databases, Programming in Java
Cleverlance, 2006

Fundamentals to J2EE, XML, and XSL in Practice
Cleverlance, 2006

Negotiation Skills, Time Management
Dynargie, 2005

Java Language Workshop
Sun Microsystems, 2000

ABOUT ME

I'm an experienced Software and Test Engineer with a strong background in back-end development, specialising in APIs, testing, automation, and system reliability. Recently, I've expanded into front-end frameworks like React, PrimeFaces, JavaScript, and TypeScript, enhancing my full-stack capabilities. With experience across mobile, desktop, and SaaS platforms, I adapt quickly to diverse roles—from development and DevOps to testing and support. I thrive in agile environments, driven by continuous learning and meaningful challenges. Outside work, my passion for wind and water sports fuels my resilience. I'm currently available with approximately two to three weeks' notice, keen to apply my broad skills and proactive approach in my next role.

EXPERIENCE

Full Stack Developer (Contract)

Hamilton Jet – Christchurch, NZ

March 2025 – now

- Acted as the sole developer on this project, independently navigating complex technical decisions and rapidly delivering solutions under tight timelines.
- Modernised a legacy enterprise application by developing new backend features using Java 21 and Quarkus, and integrating with the M3 ERP system.
- Enhanced performance and stability of the JSF/PrimeFaces front-end, addressing technical debt and optimising user workflows.
- Proactively introduced a disciplined approach to writing unit tests (system, integration, and end-to-end) ahead of planned changes, embedding TDD practices into the project's workflow.
- Resolved complex API and integration issues with external systems, ensuring data consistency and robust error handling.
- Collaborated with stakeholders to identify requirements and deliver incremental improvements, focusing on bug fixes, security, and maintainability.
- Expanded technical documentation and contributed to DevOps tasks such as build configuration in Jenkins, Docker container scripting, and dependency management.

Skills & Technologies: Java 21, Quarkus, JSF, PrimeFaces, MSSQL, REST APIs, Maven, Git, Jira, M3 ERP.

Full Stack Developer (Student)

Dev Academy Aotearoa – Christchurch, NZ

July 2024 – December 2024

- Intensive 17-week immersive web development boot camp covering JavaScript, TypeScript, CSS, React, Node.js, and Express.
- Built collaborative full-stack applications using Agile methodologies and test-driven development.
- Enhanced communication, interpersonal, and teamwork skills through human skills workshops and team projects.

Skills & Technologies: JavaScript, TypeScript, React.js, Node.js, Express, Agile, UX, Figma, MiroBoard, TDD, GitHub Actions

Support & Test Consultant (Contract)

SharpMind Games – Christchurch, NZ

March 2024 – May 2024

- Implemented Agile Test Management in Jira, streamlining workflows.
- Automated email trend analysis and researched AI-based email processing.
- Supported the launch of a new Solitaire website and maintained a legacy Puzzle platform.
- Provided technical support, tested game logic, engines, and ads, and communicated user feedback to the development team.

Skills & Technologies: GitLab, WordPress, Python, React.js, Jira, Confluence, Playwright, Figma

DANIEL MLADEK

SOFTWARE DEVELOPER

TECH SKILLS

- Java (J2SE/J2EE), Spring Boot, JAX-RS, Hibernate, JPA
- JavaScript/TypeScript, React.js, Vitest
- RDBMS (MySQL, MSSQL, Oracle)
- Shell & Bash scripting, Python, Groovy
- AWS, Docker, Kubernetes, Octopus
- Azure, GitHub Actions, Jenkins
- VCS (Git, SVN, CVS, ...)
- Virtualization (VirtualBox, VMware ESXi, Hyper-V)
- POSIX (various Linux distros, macOS, Solaris)
- Windows, WSL
- Networking (TCP/IP, DNS, DHCP, FTP)
- Testing (Selenium, Playwright, JUnit, Mockito, EasyMock, BDD, Cucumber & Gherkin, Vitest)
- Methodologies (Agile, SCRUM, Kanban, BDD)

HUMAN SKILLS

- Team Collaboration
- Conflict Resolution
- Courageous Conversations
- Empathy & Trust, Active Listening
- Emotional Intelligence and Reflection
- Diversity & Inclusion

ADDITIONAL

- NZ & EU Citizen
- Drivers Licence
- First Aid & CPR Certification

INTERESTS

- Camping and hiking with family
- Coaching kids @ NBSLSC
- Outdoor, MTB, Kitesurfing, fishing, scuba
- Cooking, listening to music, DIY

REFERENCES

Available on request.

EXPERIENCE CONTINUED

Java Developer

Fusion5 NZ – Christchurch, NZ

November 2022 – February 2024

- Developed APIs for payroll and HR data integration, enhancing the Jemini system's back-end.
- Implemented RESTful web services (JAX-RS) and crafted JPA queries.
- Occasionally supported front-end development using ZK OSS Ajax WebApp Framework.

Skills & Technologies: GitHub, Azure, MS SQL Server, Java 11, Spring, JPA, Hibernate, Postman

Java Developer

Trimble NZ – Christchurch, NZ

June 2019 – October 2022

- Developed APIs for system integration (licensing and identity services).
- UI (AngularJS and Vue) and backend (Spring), following TDD for REST APIs.
- Automated Jenkins builds deployed to AWS using Docker and Kubernetes.
- Used Salesforce briefly for customer support ticket handling.

Skills & Technologies: Java, Spring Boot, Hibernate, JMS, Git, BitBucket, AWS, Jenkins, Octopus, SQL, Postman, Salesforce

Android Platform Build & Test Engineer

Trimble NZ – Christchurch, NZ

April 2018 – June 2019

- Migrated dispersed build jobs into Jenkins Pipelines, improving efficiency.
- Set up virtual and physical servers tailored to project needs and established local clones of large Android OS repositories.
- Established test processes to ensure Android compatibility standards were met.

Skills & Techs: Git, Gerrit, Jenkins (Pipelines, Groovy), Shell scripting, ADB tools

Test Integration Engineer (Contract)

STATS NZ – Christchurch, NZ

July 2017 – Feb 2018

- Contributed to NZ's 1st online Census, ensuring system stability and scalability.
- Developed automation tools and led testing for mail data process, supporting online/offline participation.
- Extensive use of Salesforce and DataLoader for integration and load testing.

Skills & Technologies: GitHub, Jenkins, DataLoader, Salesforce, Python, MSSQL, MuleSoft API

Software Test & Build Engineer

Orion Health – Christchurch, NZ

May 2011 – May 2017

- Developed CI/CD pipelines, automating acceptance tests with Selenium.
- Managed test environments, performed code reviews, and collaborated closely with development teams.

Software Tester

Emendo – Christchurch, NZ

August 2009 – April 2011

- Created and executed test strategies for CapPlan software.
- Managed bug documentation and supported Agile workflows.

J2EE Developer & Test Analyst / Team Lead

The Czech Insurance Company – Prague, CZ

January 2005 – December 2008

- Designed test plans for TIA SW, developed banking integration interfaces.
- Integrated web services using Java technologies (SOAP, XML, XSLT).

QA Engineer for NetBeans IDE

Sun Microsystems – Prague, CZ

February 2000 – September 2004

- Conducted automated and manual testing of NetBeans IDE.
- Fixed bugs, maintained QA lab environments.
